

## Problem–Solution Fit Canvas

Project: Health History Organizer (HealthVault Pro)

Date: 06 July 2026

Team ID: \_\_\_\_\_

### 1. Customer Segments (CS)

Patients, Doctors, Hospitals & Clinics, Healthcare Administrators, Family Members, Government Healthcare Organizations, Diagnostic Laboratories, Pharmacies.

### 2. Problems / Pains (PR)

Scattered medical records, forgotten prescriptions, missed medications, poor health trend tracking, duplicate tests, emergency record access issues, time-consuming patient history collection.

### 3. Triggers to Act (TR)

New doctor visit, emergency hospitalization, appointment booking, abnormal health readings, lab reports, chronic disease management.

### 4. Emotions (EM)

Before: Confused, worried, stressed. After: Organized, confident, secure, informed.

### 5. Available Solutions (AS)

Hospital portals, EHR systems, Google Drive, Practo. Pros: Digital records. Cons: Fragmented data, limited analytics.

### 6. Customer Limitations (CL)

Limited digital literacy, privacy concerns, internet issues, device compatibility, budget constraints.

### 7. Behavior (BE)

High: Upload reports, track medicines. Medium: Update vitals. Low: Configure settings and wearables.

### 8. Channels (CH)

Online: Web app, email, notifications. Offline: Hospitals, clinics, pharmacies, emergency services.

### 9. Root Cause (RC)

Fragmented healthcare ecosystem, manual documentation, lack of centralized patient-controlled records.

## 10. Your Solution (SL)

A centralized enterprise healthcare platform with Patient, Doctor and Admin portals, secure health record management, appointment scheduling, medication tracking, AI wellness insights, analytics, emergency QR card, wearable integration, and enterprise-grade security.
