Project Proposal (Proposed Solution) Report

The Health History Organizer is a secure enterprise healthcare platform that centralizes patient health records, appointments, prescriptions, reports, and analytics for Patients, Doctors, and Administrators.

Project Overview

Objective	Develop a secure multi-user healthcare management platform.
Scope	Digital health records, analytics, appointments, reports, notifications and role-based dashboards.

Problem Statement

Description	Medical records are fragmented across hospitals and paper documents.
Impact	Centralized records improve healthcare quality, emergency response and efficiency.

Proposed Solution

Approach	FastAPI backend with Vanilla JavaScript frontend following Clean Architecture and OWASP security.
Key Features	RBAC, JWT, EHR, Vitals Analytics, Medical Documents, AI Wellness Insights, Appointment Management, Audit Logs.
